

## PROVIDER SPECIALTY SKILLS LIST

CBHA collects information about provider specialties to aid in matching providers skill sets with member needs. While many behavioral health professionals work successfully with a wide range of clients and diagnoses, it is assumed you will see any age, gender, or diagnosis except those you list in the "Do Not See" section. We are needing your areas of PRIMARY specialties to be documented on this form. Please take a few minutes to indicate up to the designated number of specialties for each of the following 5 categories:
